

Our staff committments to the school goal - check it out here by zooming in, or come inside the main doors at the school.

OUR 2026/2027 SCHOOL GOAL:

STRENGTHEN LEARNING THROUGH EVIDENCE-INFORMED LITERACY INSTRUCTION AND INCREASED OPPORTUNITIES FOR STUDENT AGENCY.

Learn • Lead • Belong

October AT SSE

A month of accessibility, inclusion, digital citizenship, and meaningful learning opportunities.

LEARN: Building Building Skills for Accessible Learning

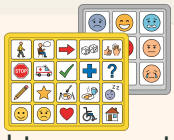

Through our accessibility work, our Grade 6/7 students are developing greater awareness of the different ways people access information and learned how accessibility tools can support independence, participation, and success at school. The Accessible Resource Centre visited SSE to share information about accessible books and text formats with students and staff, helping expand awareness of resources that support diverse learners.

LEAD: Helping Students Stay Safe Online

Grade 6/7 students participated in the TCO² program, with learning focused on online safety and exploitation prevention. These lessons provided opportunities for students to think critically about online interactions, develop awareness of potential risks, and learn strategies for safer choices in digital spaces. As students spend more time learning, communicating, and connecting online, this work helps equip them with the knowledge and confidence needed to navigate those spaces safely and responsibly.

BELONG | Accessibility & Community Support

A new outdoor communication board will soon be installed on our playground to support communication and participation for all learners.

We have also applied for a Variety Grant to purchase class sets of noise-reducing headphones and an Adopt A School grant to support grocery cards for families.

We are proud to share that SSE raised $265.70 for the Terry Fox Foundation!

WALKING TOGETHER | Indigenous ADST

Did you know? Students in Grades 4-7 English at SSE are participating in a new Indigenous ADST course led by Lorna Fraser!
Through hands-on learning, students are exploring creativity, design, and skills development while learning through Indigenous perspectives.
We look forward to sharing more student learning throughout the year.

LOOKING AHEAD

In November, we look forward to welcoming Science World to SSE, hosting our annual Library Book Sale, and beginning COPE programming for all intermediate students. These opportunities will continue to support curiosity, literacy, leadership, and student well-being.

Thank you for your continued partnership and support of our school community.
