Purpose

In accordance with [Section 69](#) of the *Freedom of Information and Protection of Privacy Act* (FOIPPA), public bodies are required to create and maintain a Personal Information Directory (PID), which lists the specific collections of personal information maintained by the public body, including a directory of personal information banks.

This requirement helps to ensure that public bodies, including school districts, are maintaining an appropriate inventory of the personal information maintained by their programs and departments. It also assists members of the public to understand what personal information public bodies maintain, and in this sense supports transparency in data management practices.

The Personal Information Directory is appended.
