

# Configuration Review

*April 2020 Update*

Thank you to everyone taking part in the SD64 configuration review process. The Board could not have undertaken this immense task without your input, energy, and cooperation. Please know that your voice is valued and the process is ongoing. Please check the district website for more information: <https://sd64.bc.ca/configuration-review-phase-ii/>

## PHASE 1

**We are listening.** In September 2019, the Board launched an extensive consultation process, receiving feedback through email, public meetings and ThoughtExchange. Feedback was collected through to December 1, 2019 and is being reviewed and sorted by the Feedback Review Committee.

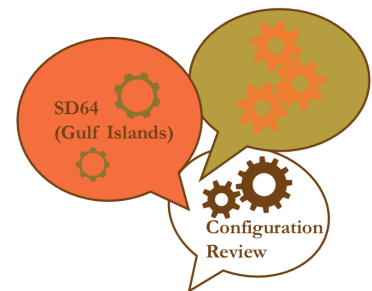

## PHASE 3

**We are implementing.** Due to COVID-19 and the temporary suspension of Board Committee meetings, the Feedback Review Committee's Report will be presented directly to the Board for thoughtful consideration. Recommendations will be brought back to the Board in September 2020 for possible implementation in the 2021/22 school year.

## PHASE 2

**We are planning.** In February 2020, the Feedback Review Committee was formed. A representative from each of our stakeholder groups (CUPE, GITA, student body, DPAC, principals/vice-principals), two district staff, and three trustees sit on the committee. The committee has met three times already and will be preparing a report for the April Education Committee meeting.

**We are grateful.** The Board wishes to express its profound appreciation to all of the SD64 education community for their feedback, cooperation and partnership on this journey.
