

APPRECIATION AND THANKS

Site-Based Committee Members

I can't thank you enough for your efforts this year helping to promote worker safety at our sites. This isn't glamorous work but it is necessary and important. So much thanks to you!

WORKING SAFELY IN THE HEAT

Hot weather can make work more tiring and increase the risk of heat strain. Taking simple steps early helps keep everyone safe and comfortable.

Please visit the [Safety Bulletins link](#) to "Working in the Heat"

CHEMICAL INVENTORY AND WHMIS AND YEAR-END JOHSC EVALUATION

As outlined in the December newsletter, all sites are required to complete a chemical product safety review by June 25, 2026. **For instructions on how to conduct this work please refer to the [WHMIS Action Plan](#) on our website.**

Please refer to the WorkSafeBC JOHSC Assessment Guide and complete your site's year-end assessment no later than June 25, 2026. You can find the documents needed to complete this work on the [website under the resources section](#).

DATA INCOMING

Site-Based Committees

A document outlining the incidents at your site will be sent to your committee and you can use this for your **year end-review** and to assist you when you review your **Violence Risk Assessment**

Attention 3D-Printer Users: A Safe Work Procedure for the safe use of 3D-Printers is now available on the [website](#). Please review and follow this procedure

Injured at work?

Visit worksafebc.com/report-injury to report injuries online at any time or call 1.888.967.5377 (8 a.m. to 6 p.m., Monday to Friday).
